

Applying professional excellence to the needs of the world

Resound is a nonprofit organization established in 1999 in response to invitations from international leaders for professionals to equip and enable local people in character and community development.

We send teachers, medical workers, community development workers, and business people into contexts where their gifts and skills create relational opportunities for professional and social development.

I want to assist **RC** in helping the world!

Contributions are solicited with the understanding that Resound has complete control and discretion over the use of all donated funds. This is to insure that your gift is fully tax-deductible under IRS rulings.

*Donations may also be made online at
www.ResoundOnline.org.*
